

Online course

MASTERCLASS

SOCIETAL COMPLEXITY

Prof. dr. Dorien DeTombe

Description

The world and our island are becoming increasingly complex. We are faced with all kinds of threats, and at the same time new challenges pop up that demand our immediate attention. In this two-day masterclass you will learn how to deal with threats and challenges posed by complex issues like sustainable development, finding new markets, healthcare and education. [Read more...](#)

Target group

The masterclass is for directors, managers of NGO's, Government and Business Owners or anyone directly involved handling complex issues and problems.

Content

Prof. Dr. Dorien DeTombe, introduces the theory and practice of complex societal problems. How complex societal problems can be analyzed and in which way sustainable answers can be found. After this masterclass you are able to recognize complex societal problems and you know how they can be handled. The participants have an active role in the course and can propose their own complex societal problems.
