

# Education in a Post- Covid World

---

Stephen Taylor, PhD  
Université de Sherbrooke  
Québec, Canada  
2021 June 03

# The Post-Covid World

---

- Consists of a web of Complex Global Societal Problems
- Climate Changes and Global Ecological Crises
- Continuing Global Health Issues
- Super Nationalism and Refusals to Participate in Global Affairs
- Continuing threats of war and terrorism
- Serious Economic Crises

# A Global Spiritual Crisis

---

- Most major religious groups are unable to adapt to the new reality and:
  - Are abandoned by the youth
  - Or generate resistance to scientific processes that might abate situations

# A New Educational Paradigm

---

- Develops resilience and adaptability
- Develops basic transferable skills
- Develops knowledge about the natural world, health, & ecology
- Develops critical thinking skills
- Develops deep ethical commitment to self & society
- Downplays nationalism

# Adult Re-Education

---

- A major challenge in a world with social media dominated by oneway thinking.

# Hopefully

---

- World youth will respond to the challenges in better ways than their parents and grandparents!
